

7-Day Practical Ophthalmic Technician Foundations Bootcamp

A Structured Path to Clinical Mastery

Spindel Eye Associates | Southern New Hampshire's Premier Eye Care Specialists

Setting the Standard for Over 35 Years

12 Dedicated Specialists

Dr. Gerald Spindel	Dr. John O'Block	Dr. Mina Farahani
Dr. David Vazan	Dr. David J. Ramsey	Dr. Nicole Leo
Dr. Mohamed Guenena	Dr. Dane Slentz	Dr. Jeffrey Chang
Dr. Sarah Wood	Dr. Brandon D. Nguyen	Dr. Jordan Noall

**Comprehensive
Care**

Surgical Excellence
(LASIK, EVOC ICL,
Cataracts)

**Advanced Retina
Treatment**

The Core Technician Philosophy

Punctuality is Preparation.

Your scheduled clock-in time is when you must be ready to take in a patient.

The Next Patient Up Mentality.

Patient care supersedes all other clinic distractions.

The Clinical Bridge.

You are the first medical interaction; you gather the vital data that allows the 12 specialists to diagnose accurately.

Scaling Your Expertise: COA vs. COT

	Certified Ophthalmic Assistant (COA)	Certified Ophthalmic Technician (COT)
Role Focus	Clinic prep and basic assessment	Advanced clinical testing and specialized diagnostics
Exam Breakdown (Visual Assessment)	6%	 7%
Exam Breakdown (Optics & Spectacles)	2%	 5%
Skill Evaluation	Multiple choice only	Requires 7-area computer-simulated skill evaluation including Lensometry, Retinoscopy, and Ocular Motility

Your Clinical Certification Opens Endless Doors

Surgical Assistant (OSA)

Assisting in LASIK, PRK, and intraocular surgeries.

Ophthalmic Photographer (CRA, OCT-C)

Specializing in high-tech retinal imaging and fluorescein angiography.

Clinical Research (PI Support)

Testing new drugs, FDA clinical trials, and novel therapies.

Practice Management

Overseeing clinic workflows, staff scheduling, and healthcare compliance.

Clinical Application Specialist

Traveling to train professionals on advanced ophthalmic devices.

The 7-Day Bootcamp Architecture

Day 1 | Foundations of Ophthalmology & Clinic Workflow

Core Concepts

Mastering the Chief Complaint

History of Present Illness (HPI)

Systemic & Ocular Medication Review

Infection Control
(Tonometry tip disinfection, hand hygiene)

Exam Room Application

Always review the patient chart before calling them.
Clarify symptoms meticulously—blurred vision is diagnostically distinct from double vision.

Day 2 | Basic Eye Anatomy & Physiology

Exam Room Application: Understanding the visual pathway from light entry to Cranial Nerve II.

Day 3 | Essential Diagnostic Testing

Tonometry

Measuring
Intraocular Pressure

Visual Fields / Perimetry

Mapping peripheral
vision and optic
nerve health

OCT Imaging

High-resolution
cross-sections of
the macula and
optic nerve

Pachymetry & Topography

Corneal thickness
and surface mapping

Exam Room Application: Ensure precise patient positioning; watch for motion artifacts during scans.

Day 4 | Common Eye Diseases & Red Flags

“Anatomy-to-Pathology” mapping matrix

Structure	Disease	Clinical Sign
Lens	Cataracts	Cloudy vision, glare
Optic Nerve	Glaucoma	High IOP, peripheral field loss
Retina/Macula	Macular Degeneration / Diabetic Retinopathy	Central vision distortion, microaneurysms
 Tear Film	Dry Eye Syndrome	Gritty sensation, fluctuating vision

Exam Room Application: Immediately flag flashes, new floaters, or sudden vision loss for the attending physician.

Day 5 | Clinical Skills & Exam Room Techniques

Skills Checklist

- ✓ Refraction Basics
- ✓ Instilling Eye Drops safely
- ✓ Slit Lamp Assistance

Deep Dive: Manual Lensometry (The Marco LM-101)

Exam Room Application: Calibrate the eyepiece to your own eye before reading a lens to ensure accurate sphere, cylinder, and axis measurements.

Day 6 | Professional Skills & Patient Care

Priority Pyramid

Day 7 | The Clinical Launch

The Mock Patient Workup Simulation

- 
- ✓ **Step 1: Intake & History**
(Chief complaint, medical/ocular history).
 - ✓ **Step 2: Visual Acuity**
(Accurate Snellen documentation, distance and near).
 - ✓ **Step 3: Diagnostics**
(Tonometry measurement and Lensometry reading).
 - ✓ **Step 4: Handoff**
(Accurate EMR entry and seamless presentation to the physician).

Next Steps:

Logging clinical hours for the IJCAHPO COA Exam.

CERTIFIED

Welcome to the Team.

You are now equipped with the blueprint. Your efforts, precision, and care will directly impact the vision and lives of patients across Southern New Hampshire.

Review the clinic workflow, bring your questions, and prepare to launch your clinical career on Day 1.
